cans—The Evils and How Restored.

In this age of bustle and hurry, an age devoted to great projects and enterprises, the American people are taking the lead in the furtherance of noble works, and in the advancement of the sciences and arts. In these they descrive to take a high rank, and through the united works of millions, the American continent is fast being transformed from its untanned state and being placed on an equality with the older continents beyond the ocean. The American people are fast, under these influences developing into a nervous, energetic race, remarkable for its vim and business qualifications; yet there is danger that in the course of years these very elements may combine to the ruination of the physical character of the people, and leave them course of years these very elements may combine to the ruination of the physical character of the people, and leave them feeble and allogether different from their forefathers. General debility is now much more common than formerly, and seems to be on the increase among the masses. Many remedies have been extensively advertised for this wide-spread complaint, but none of these have been so successful or met with such general favor as the man, and named by him Perrun.

Mr. S. Goudy, of Massillon, Stark county, Ohio, writes: That he has been troubled with general debility and dyspensia for several years; that he was induced to try Perrun years; the was induced to try Perrun years; the was induced to try Perrun years; the was induced to try Perrun years; that he was induced to try Perrun years; the was induced to try Perrun years; the was induced to try Perrun years years

Mrs. G. W. Needham, Newtonville,
Clermont County, Ohio, says: "I have
been a great sufferer for the last six or
seven years, with general debility and
change of life. I was very much reduced.
I have taken four bottles of PERIUSA, which
has restored me to perfect health and
strength. We think PERUNA a safe and
orrand medicine."

Fallure of Owens & Barkley.

The financial embarrassment of Messra.

Owens & Barkley, which has made necessary an assignment for the benefit of their creditors, is generally deplored by the community. The step was made necessary by the shrinkage in value of an immense stock and the difficulty of collecting the money due the firm by their castomers. The creditors, nearly all of whom are in the East, appreciating the high personal character and business in tegrity of both Mr. Barkley and Mr. Owens, offered any accomodation in the way of extending their paper that might be desired, but the firm deemed it wiser to give up than to continue to struggle along under a burden of debt.

The firm of Owens & Barkley began business in 1864 as the successors of Owens, Pinkard & Barkley, who were burned out a year previously, and lost by the disaster about \$440,000. They took one of the houses now occupied by them on Second street and began upon a limited scale the business which grew to be one of the most extensive of the kind in the State, covering territory in the three States of Kenteky, Ohio and West Virginia. Their yearly sales frequently aggregated \$250,000. They have in their several departments eleven floors over one hundred feet long, and usually carry a steek valued at from \$150,000 to \$200,000. Both members of the firm have been active in promoting all useful enterprises for the improvement of the city, and have contributed to such purposes iliberally of their friends and the general public, whe hope that an arrangement will be made that will not necessifiate the reasoval of so important a business in factory and the complete of the work of the wore

The Gas Question Again.

The Gas Question Again.

Editor Bulletin: The city council meets to-night, and this being the anniversary of the expiration of the city's contract with the Gas Company for lighting the streets, some positive action should be streets, some positive action should be of the exorbitant price charged consumers in this city for gas. In the opinion of many well posted citizens, the price of gas to private consumers should not exceed \$1.50 per one thousand feet, instead paying about \$5,000 per anum for lighting the streets, or say fifteen per cent. of the original cost of the works. We ask if it would not be better that the city have the gas turned off the street lamps than to have her citizens longer imposed This action, we think, might tend to bring the Gas Company to a realizing sense of the injustice being done private consumers.
